Experience

PennWell
2011 – Present

Website Manager
Manage the ongoing projects for 30 B2B websites to ensure on time completion and outstanding results. Developed a custom browser extension utility to help CMS users navigate through the various websites. Collaborate with and guide product managers to help steer roadmaps towards completion and technical success.

Ad Tech Manager
Lead the team responsible for implementing 1000+ digital advertising campaigns each month. Developed custom API and web app solutions for ad operations team. Improved processes and workflow by collaborating with sales staff and customers.

Digital Media Advertising Support Specialist
Spent most of time troubleshooting advertiser's rich media creative. Worked with hundreds of advertisers each month via e-mail to collect, troubleshoot, and fulfill advertising campaigns.

Self Employed
2009-2010

Web Designer & Developer
Worked on many different projects, including WordPress websites, flash animations, an iOS game, and launched an affiliate marketing website.
